WELCOME TO EAGLE HOUSE SCHOOL

A SMALL SCHOOL WITH A BIG HEART!

Eagle House School offers a **student-centered hybrid learning environment** that combines in-person teaching with structured digital learning. Our model allows students to benefit from **small classes, personalised academic support, and flexible learning pathways**.

Students begin with a strong enhanced Grade 8 foundation year, where **core academic skills**, study strategies, and subject readiness are developed.

From Grade 9, students choose their **academic pathway**, continuing with the **IEB National Senior Certificate** or transitioning to the **Cambridge International pathway** (IGCSE leading to AS & A Levels).

This flexible structure allows Eagle House students to follow the pathway that **best supports their learning style, academic goals, and future university ambitions**.

HYBRID LEARNING

Combining classroom teaching with digital learning tools allows students to access lessons, resources, and academic support both on campus and online. This ensures flexibility while maintaining strong teacher-led instruction.

PERSONALISED ACADEMIC SUPPORT

Small classes allow teachers to provide individual guidance and targeted academic interventions, ensuring that every student receives the support needed to succeed.

FLEXIBLE ACADEMIC PATHWAYS

Students can pursue either the IEB National Senior Certificate or the Cambridge International curriculum, choosing the pathway that best suits their strengths and future university goals.

Every learner begins with a strong academic foundation before choosing the pathway that best supports their future.

OFFERING & PATHWAY

Grade 8 – Enhanced / Enriched Foundation

Students build strong academic skills, study strategies, and subject readiness.

CHOOSE YOUR ACADEMIC PATHWAY

CAMBRIDGE PATHWAY

- IGCSE – Grades 9–10
- AS & A Levels – Grades 11–12

IEB PATHWAY

- Senior Phase – Grade 9
- NSC – Grades 10–12

HYBRID LEARNING

Lessons are taught live in the classroom and simultaneously online, allowing students to participate in real time. Classes are recorded and accessible afterwards, ensuring continuity if a learner cannot attend physically.

Quadratic Equations

Solve for x:

$$2x^2 - 5x + 2 = 0$$

$$a = 2, b = -5, c = 2, x = \frac{5 \pm \sqrt{5^2 - 4 \cdot 2 \cdot 2}}{2 \cdot 2}$$

$$x = 2 \text{ or } x = \frac{1}{2}$$
